

VENABLES OAK

OAK BEAMS

Venables Brothers is one of the few timber merchants in the UK to carry large stocks of fresh sawn and air dried oak beams. This helps to achieve a quick turnaround for standard sizes. The company has a thorough knowledge of the different methods of sawing and production and of the end use of oak beams. Venables Oak is popular with self builders and with timber framed building specialists alike.

Director, Chuck Venables advised the Building Research Establishment on the development of the British Standard for the grading of oak beams. He was the first grader in the UK to be certified to grade BS5756.

From green oak for a new build to air dried oak for a complex restoration project, the company offers a complete advisory service on any issue.

Oak beam sizes in stock

- 100 mm x 100 mm
- 120 mm x 120 mm
- 150 mm x 150 mm
